VIGNESH SATHISHKUMAR

BUSINESS ANALYST | BUSINESS OPERATIONS | PROCESS IMPROVEMENT

Chennai, India | +91 8667322750 | vigneshorca@gmail.com | linkedin.com/in/vignesh-sathishkumar

PROFESSIONAL SUMMARY

Business operations and technology professional with nearly four years of experience at Infosys supporting enterprise banking and telecom processes. Skilled in business requirements clarification, workflow analysis, reporting automation, SQL-based data validation, incident investigation and cross-functional delivery. MBA graduate with experience coordinating operational activities, improving process controls and translating business needs into practical system enhancements.

CORE COMPETENCIES

Business Analysis: Requirements Analysis, Business Process Mapping, Workflow Optimization, Gap Analysis, Functional Validation, Stakeholder Coordination, Change Support

Business Operations: Operational Reporting, KPI Tracking, Issue & Incident Management, Root Cause Analysis, Process Standardization, Service Delivery, Risk & Dependency Tracking

Data & Tools: Oracle SQL, MySQL, Advanced Excel, Power BI, Jira, Confluence, PowerPoint, REST APIs, Postman, Agile/Scrum, Jenkins

PROFESSIONAL EXPERIENCE

INFOSYS LIMITED | System Engineer – Business Applications & Operations | Feb 2022 – Jan 2026

- Collaborated with business stakeholders, developers and QA teams to clarify functional needs, analyze existing workflows and support enterprise application enhancements across banking and telecom.
- Supported Core Banking Transformation workflows involving billing records, employee–project mapping, resource extension reminders and automated operational reporting.
- Developed and enhanced Spring Boot REST APIs and Oracle-backed application services to streamline information retrieval, reporting and business-rule execution.
- Used Oracle SQL, API checks and application logs to investigate data discrepancies, validate records, troubleshoot functional defects and support accurate reporting.
- Implemented banking product change-request workflows with role-based approvals, validation rules and controls restricting unauthorized or self-approval actions.
- Tracked application issues, coordinated resolution with cross-functional teams and supported functional testing, release readiness and knowledge transfer.
- Supported telecom delivery operations through Jenkins-based deployments, Linux environment checks and coordination of production and non-production releases.

BYJU'S | Business Development Associate – Team Coordination | Jul 2020 – Dec 2020

- Coordinated day-to-day activities of a six-member sales team, including customer follow-ups, performance monitoring and operational updates.
- Conducted team training sessions and helped improve consistency in sales follow-up processes and reporting.

ASHOK LEYLAND | Operations & Industrial Intern | May 2019

- Observed manufacturing workflows and documented operational processes, material movement and opportunities to reduce workflow bottlenecks.

RELEVANT BUSINESS & OPERATIONS PROJECTS

Core Banking Transformation – Reporting & Process Automation: Supported billing information workflows, resource tracking and operational report generation; investigated data and process issues using Oracle SQL.

Brand Product Parametrization – Approval Workflow Improvement: Supported controlled product-change processes through role-based access, approval validations, REST integration and exception handling.

Enterprise Delivery Operations: Supported release coordination, defect tracking and incident investigation across application and infrastructure teams.

EDUCATION

Master of Business Administration (MBA) | Vellore Institute of Technology (VIT), Chennai | 2026

B.Tech – Mechanical Engineering | Amrita School of Engineering, Coimbatore | 2016–2020
